## Media Release

# Adani Transmission receives Letter of Intent (LOI) for Centre Sector Transmission Project linked to Renewable Energy in state of Gujarat

## LOI received for Jam Khambaliya Transco Limited

**Ahmedabad, 31 October 2019;** Adani Transmission Ltd (ATL), the largest private sector power transmission company operating in India, has received the Letter of Intent (LOI) from REC Transmission Projects Company Limited (RECTPCL) to build, own, operate and maintain a transmission project in the state of Gujarat for a period of 35 years.

**Mr. Anil Sardana, MD & CEO, Adani Transmission Ltd** said, "Both the projects present substantial shareholder value creation as they are significantly value accretive within a relatively short gestation period. It is also a great opportunity to continue our commitment to transmitting bulk green power within the country and catering to India's climate goals."

The project "**Jam Khambaliya Transco Limited**" comprises of approximately 40 ckt kms of 400 kV D/C line along with 400 kV Substation at Jam Khambaliya in Gujarat. This project is primarily being constructed to establish Transmission System associated with Long Term Applications from Gujarat's Wind and Solar Energy Zone in Jamnagar. The associated transmission line in the project shall be used to evacuate power generated by renewable energy generators in Jam Khambaliya region to Lakadia Pooling station.

The project has been awarded to Adani Transmission through Tariff Based Competitive Bidding Process.

## About Adani Transmission

Adani Transmission (ATL) is the transmission business arm of the Adani Group, one of India's largest business conglomerates. It is the country's largest private transmission company with a cumulative transmission network of more than 14,340 ckt kms, out of

which more than 11,470 ckt kms is operational. This includes around 2,860 ckt kms in various stages of construction. With India's energy requirement set to quadruple in coming years, Adani Transmission is fully geared to create a strong and reliable power transmission network and work actively towards achieving 'Power for All' by 2022.
